Standard Equipment/Optional Equipment

Standard Equipment

Multifunction back lit instrument display	Automatic speed reduction when cornering			
Key switch or Log in Pin code: ignition	AC motor			
Unique and intuitive 45° driving position (SP)	Automatic braking			
Safety zone operator's compartment with padded leg and	Electromagnetic emergency brake acting proportionally			
backrests with cushioned suspended platform (SP)	the load weight			
Dedicated work station (with storage compartments)	Cushion drive wheel			
Innovative single handed Linde e-driver® control (SP)	Polyurethane active castor wheels			
Power assisted steering with speed proportional steering	Polyurethane single load wheels			
resistance	Foldable stand-on platform with side guards (AP)			
Positive steering (drive wheel) feedback	Horn			
Self-centring steering (SP)	Protection -10°C			

Optional Equipment

Alternative fork dimensions

Drive wheels: polyurethane, cushion non-marking or wet grip Load wheels: Tandem polyurethane or single/tandem polyurethane greasable load wheels

Clipboard

On-board mounting for computer or clipboard

Load backrest 1200mm

Mobile and fixed battery stands (for side battery change) Non marking cushion rubber drive wheels

Width over forks 520, 560, and 680 mm Fork lengths 1000, 1150, and 2350 mm

Coldstore protection to -35°C

Other options available on request.

Safety

High performance combined with safety. The wraparound steel chassis keeps the operator safe from impacts while working (SP). A low, steel skirt surrounding the stand-on platform protects the operator's feet and legs (SP). The operator's body remains safely within the chassis contours at all times while operating the truck (SP).

Performance

Highly efficient productivity is the Linde pallet truck's true strength. Their performance derives from a powerful 3 kW AC maintenance-free drive motor and active stabilizing castor wheels. Rapid acceleration and impressive travel speed combined with efficient braking in all conditions. This all adds up to outstanding productivity ratios in every type of application.

Comfort

The ergonomic 45° driving posture of the SP version, enables effortless, stress-free multidirectional working with excellent all-round visibility. A padded backrest and cushioned standon platform provide added comfort. A comfortable operator remains motivated and maintains high efficiency levels throughout the working shift.

Reliability

Linde Material Handling

The highly durable, robot welded construction of the SP and AP ensures consistent reliability and long life in demanding applications. Each heavy cast fork tip can support a load of 2,000 kg without deformation. Smooth entry into bottom boarded pallets is assisted by the ski contours of the underside of the fork tips. The arrow shaped fork tips also facilitate easy entry into every type of pallet and through shrink wrapping for fast, efficient and safe load handling.

Efficiency at work and efficiency in servicing with cost effective maintenace routines. Easy access to all components and maintenance-free technology also play their part. CAN bus connectivity provides a computerised diagnostic system for rapid analysis to ensure maintenance intervals are minimised.

Features

Total drive system

- → Electronically controlled, hydraulically suspended castor wheels automatically select optimum ratio between stability and traction
- → Automatic electric braking when traction lever is released to neutral
- → Smooth counter current braking and no roll back on gradient starts
- → Proportional electromagnetic braking on drive motor initiated by emergency isolator or release of pressure on deadman switch

Linde e-driver®

- → Unique Linde e-driver controller, the perfect interface between truck and
- → Asymmetrical design leaves more room for first-level access
- → Enables effortless one-handed opera-
- → All controls grouped on the controller
- → Combines with 45° driving posture

Batteries and chargers

- → Vertical battery change as standard → Optional battery on rollers for side
- changing to left or right → Battery locking device secures battery
- within the chassis → Choice of batteries from 250Ah (2PzS)
- to 620 Ah (5PzS) to suit every type of application
- → Wide range of standard and wallmount chargers to suit every power supply requirement

Workstation

- → Digital multifunction display
- → Truck access control by unique PIN code or by ignition key
- → Wide and deep storage compartments for wrapping paper, work gloves, writing utensils, etc.

CAN bus connectivity

→ On-board diagnostics and CAN bus

Ideal 45° driving position

→ The 45° driving posture (SP) provides

effortless multi-directional driving → Superbly functional Linde e-driver

- → Provides service technician with rapid access to all truck data for performance parameter settings, trouble shooting and preventative maintenance

AC motor

- → Powerful, 3 kW drive motor
- → Moisture and dust proof motor is maintenance-free
 - → The truck accelerates smoothly to 10 km/h in less than 5 metres
 - → Max. speed of 10 km/h laden/unladen
 - → Gradient performance 13% fully laden → No roll back on gradient starts
 - → High torque motor negotiates loading docks with ease

Power steering for comfort and safety

- → Self-centring, power assisted steering keeps truck on track in a straight line
- → Steering effort adjusts automatically to speed and turning radius
- → Speed is automatically reduced in relation to the steering angle
- → The result is effortless manoeuvring and safe, highly efficient load handling
